Pioneering Advancements in Maritime Technology.

ShinraiTEXSAR is committed to driving innovation through cutting-edge research and development:

-  **SUPERVISION**
Our versatile team, consisting of Marine Engineers, Master Mariners and Naval Architects, ensures that all aspects of assigned projects whether it is Designing, Preparation of plans towards class approval or preparation of productions plans, Preparation of dry-dock specifications, Supervision of vessels during dry docking/During New building phase/Conversions/Retrofits are all well planned and executed to meet client expectations.
-  **HULL FABRICATION**
Our team comprises – Safety & Quality In-charge, Site supervisors, Qualified welders, Fitters, Cutters, Markers, Grinders, Helpers, Electrician, Storekeeper & Security guards. All handling & lifting tools/appliances are fully certified, and the manpower complies with applicable local labour laws.
-  **OEM**
We design and manufacture Load line equipment such as manholes with covers, entrance hatches with securing arrangements, weather-tight doors, watertight doors with single-action operation and remote monitoring, hatch cover securing arrangements, vent covers and air pipe heads. Our equipment meets all class and statutory requirements towards approval.
-  **TYPE APPROVALS**
We assist existing OEMs to design & manufacture marine equipment to Class, Statutory to IMO performance standard and Marine Equipment Directive (MED) of EC, & obtain various statutory approvals (Class approval, Type approval, EC type approval) to certify their equipment as “Marine Approved”.
-  **INSPECTIONS**
Our team boasts a vast experience of statutory & commercially obligatory surveys, audits and inspections, of all kinds of vessels. Chief Engineers (MEO Class-1), Master Mariners (FG) & Naval Architects form our core inspection team.

Your Trusted Partner for Maritime Success.

At **ShinraiTEXSAR** we prioritize:
